(54) IMAGE ALLOCATING DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To improve operability in the case of allocating a lot of images or correcting an allocation condition.

SOLUTION: An allocation window W1 showing an allocation object area and a list window W2 showing prepared images with the icon of thumbnail form are displayed on the screen of a display 100 and image frames A-D in any arbitrary shape are prepared within the allocation window W1 by using a mouse. A mouse pointer MP is carried onto the icon of an image 3 and by dragging and dropping this icon into the image frame B, the image data of the image 3 are allocated within the image frame B on initial trimming conditions. When the inside of the image frame B is double clicked, a trimming window is displayed and by resetting a relative position relation between the trimming frame and the image in this case, trimming conditions can be changed.
